

II- Comprehension

5

Read the following text then answer the questions:

Butterflies are some of the most interesting insects on the planet Earth. There are more than seventeen thousand different kinds of butterflies! Butterflies come in all shapes and sizes.

Butterflies go through **four main stages** of life. The first stage is the **egg stage** followed by the **larva stage**. As a larva, or caterpillar, the future butterfly eats as much as possible. As it grows, it sheds its outer skin. This may happen four or five times. After a few weeks, the caterpillar enters the next stage of its life, the **chrysalis stage**. In the chrysalis, the caterpillar will liquefy into a soup of living cells. Then, it will reorganize into a **butterfly** and the metamorphosis is complete. In later parts of the chrysalis stage, you can see the forming butterfly through the chrysalis.

When the butterfly emerges from the chrysalis, it pumps its wings to send blood through them so that it can fly. Most butterflies only live a couple of weeks, just enough time to drink flower nectar and to mate. Some, like the Monarch Butterfly, however, may live many months.

a) Answer the following questions:

1-What type of creatures are the Butterflies ?

2-How many kinds of the Butterflies are there ?

3-Do they come in one shape and size ?

1
1/2

B) Match with the correct answer. There is an EXTRA 1:

4- Butterflies go through

a- it eats as much as possible.

5- As a caterpillar

b- the larva sheds its outer skin.

6- Four or five times

c- egg stage.

d- four main stages of life.

1
1/2

C) Put TRUE or FALSE in front the following sentences:

7- In chrysalis stage, the caterpillar swim in a soup of living cells.

a. TRUE b. FALSE

8- After finishing the third stage, the caterpillar change to be a butterflies.

a. TRUE b. FALSE

9-The butterflies hate the flower nectar .

a. TRUE b. FALSE

10-The butterflies live for 100 years .

a. TRUE b. FALSE
